

Zoner Software appoints first Asian distributor

Zoner software

Brno, Czech Republic, March 17, 2009 – Zoner Software, a leader in digital photography and graphics software solutions, announced today that it has entered into a distribution agreement with Version 2 Limited, one of the most dynamic IT companies in Asia.

We are looking forward to a rapid expansion of our customer base in Asia, particularly among the avid hobbyists, advanced photographers, point and shoot photographers,” said Zoner Software Managing Director Pavel Minar.“

Zoner Software offers a comprehensive range of photo editing software. Zoner Photo Studio is Zoner Software’s flagship product and was the first comprehensive photo processing program to support GPS (Global Positioning System) location data, and 3D picture making. Our forward-thinking technologies include future-proofing with support for the latest multiple processor computers to improve your workflow, superb color management, and exceptional support for industry standards.

“We look forward to a long and mutually profitable relationship with Zoner Software and have great confidence in the company’s products,” said Version 2 Limited company Regional Sales Manager Michael Li.“ We are able to offer quality service and support to all customers at the highest level, which is particularly important in the photography sector.”

About Version 2 Limited
