Zoner Photo Studio 11 Now Available in German

(Brno, Czech Republic, July 15, 2009) — **Zoner Software,** a leader in digital photography and graphics software solutions, announces today the availability of the German version of its renowned Zoner Photo Studio 11.

Zoner Photo Studio is a well-known digital photo processing program that is popular with photographers for its ease of use and its broad array of available features. *"We are very pleased to release yet another localized version of the product. The very positive customer feedback for Zoner Photo Studio has convinced us that an enthusiastic localization plan is the right way to go. Version 11 builds on the success of earlier versions and introduces even more functionality, including the new Editing Layer. Customers are telling us that they are very happy with the product — and that's our goal,"* says Managing Director Pavel Minar.

Zoner Photo Studio is available in two editions: Home and Professional. **Zoner Photo Studio Home Edition** is handy for point-and-click photographers looking for one-click editing features and flexibility for creatively sharing photos, calendars, panoramas and other presentation formats. **Zoner Photo Studio Professional Edition** offers advanced photographers and avid hobbyists a wide selection of features designed with their workflows in mind, covering everything from organizing and editing to publishing.

About Zoner Software
Zoner Software is the developer of industry-leading digital photo and graphics software solutions for personal and professional use. Zoner Software products are available around the world and are used by hundreds of thousands of customers. Zoner Software products have been localized in 12 languages.

Zoner Photo Studio is a comprehensive software program for work with digital photographs. It includes all the necessary tools for photo processing, including editing, creating effects, organizing, archiving, publishing and sharing your work. Zoner Photo Studio was the first comprehensive digital photo processing software to include support for GPS, and the creation of 3-dimensional pictures.
