

PRESS RELEASE NO. 01/2010

Zoner Software, Brno, Czech Republic

Zoner Photo Studio 12 Now Available In Multiple Languages

(Brno, Czech Republic, January 27, 2009)—Zoner Software, an innovative graphics software company, has launched its flagship product Zoner Photo Studio 12 in four additional languages.

Zoner Photo Studio is now available in the German, French, Italian and Russian languages. The hugely popular English version was initially launched, alongside a Czech version, in 2009. *“This wide availability enables our customers to work natively in their language,”* says Managing Director Pavel Minar.

Zoner Photo Studio is designed to satisfy a wide range of users—from amateur photographers to semi-professionals and professionals. Zoner Photo Studio is great for organizations as well. **Version 12** brings major improvements in key areas of the digital photography workflow, including a new interface that is superior at first sight.

The new releases also provide Zoner Software's partners with a flexible multilingual product that helps them compete in a global marketplace. *“The very positive international customer feedback for Zoner Photo Studio has convinced us that a strong localization plan is the right way to go,”* added Minar. *“So we are already preparing further localizations.”*

The product is available in two editions:

Zoner Photo Studio 12 Home is handy for point-and-shoot photographers looking for flexibility and one-click editing, but also a way to creatively share photos—to present them using calendars, panoramas, and more.

Zoner Photo Studio 12 Professional offers advanced photographers and avid hobbyists a broad selection of features designed for the way they work, covering everything from organizing to editing to publishing.

Zoner Photo Studio 12 is available as a free 30-day trial at www.zoner.com.

About Zoner Photo Studio

Zoner Photo Studio is comprehensive software for work with digital photographs. It accompanies users throughout the whole cycle of photo processing, including acquiring, editing, and touch ups, creating effects, organizing, archiving, publishing and sharing their work. Zoner Photo Studio was the first comprehensive digital photo processing software to include support for GPS and for creating 3D pictures.
