Zoner Software, Brno, Czech Republic

Zoner Software Launches New Product: Zoner Photo Studio Free

(Brno, Czech Republic, May 3rd, 2010)—Zoner Software, an innovative graphics software company, announces the launch of Zoner Photo Studio Free. This software helps users easily manage pictures, edit them, and share them online with family and friends at home and around the world.

"Many of us here take pictures, so we know people want fast, efficient software that helps them share great pictures quickly. They don't want to have to switch nonstop between one program for managing photos, one for something creative like panoramas, and another for web sharing. They want an all-in-one solution. That's why Zoner Photo Studio Free has all these features built in," said Managing Director Pavel Minar. Zoner Photo Studio Free is made for beginners, but powerful enough for the experts. It offers much more than the photo managers that come with cameras. *"Zoner Photo Studio Free is intuitive, and it's easy to get started. It's also so handy for your photo work that you may find you never want to stop,"* says Ales Hasala, Zoner Software's Director of Development.

Zoner Photo Studio Free offers features that users will appreciate to get the most out of their digital memories, including:

- Automatic red eye removal
- Cropping
- Horizon levelling
- Panorama creation
- 3D picture making
- One-click **Quick Fix**
- Fast **Sort Pictures** window

Users seeking advanced photo processing can turn to Zoner Software's flagship product, Zoner Photo Studio 12 Professional.

Zoner Photo Studio Free is free for personal and non-commercial use on single computers running Window XP, Vista, or Windows 7. The product is available in English only. Support for Zoner Photo Studio Free is available on the Zoner Software website, including a FAQ and our blog at free.zoner.com. Download the software at free.zoner.com or at third party download sites such as softonic.com.

About Zoner Photo Studio

Zoner Photo Studio is comprehensive software for work with digital photographs. It accompanies users throughout the whole cycle of photo processing, including acquiring, editing, touchups, creating effects, and organizing, archiving, publishing, and sharing their work. Zoner Photo Studio was the first comprehensive digital photo processing software to include support for GPS and for creating 3D pictures.
