

PRESS RELEASE NO. 06/2012

Zoner Software, Brno, Czech Republic

Zoner Callisto Vector Graphics Editor Now Available for Free

(Brno, April 16th) Zoner Callisto, the universal vector graphics editor by ZONER software, is now available as freeware. This new version, Zoner Callisto 5 FREE, is functionally identical to the last paid version, Zoner Callisto 5, and can be downloaded entirely for free from Callisto.cz for both personal and commercial use.

"This software has gained many devoted users thanks to its simplicity and flexibility, and a lot of them swear by it. It's also very popular in schools," says marketing department manager Michal Prouza of the program. He adds: "Interest in Zoner Callisto has remained so strong that we decided to publish a free version. For the less demanding users and for teaching the basics of vector graphics, Zoner Callisto remains a good choice to this day."

ZONER software ceased development of Zoner Callisto several years ago and is now fully focused on its flagship, the Zoner Photo Studio digital photography suite.

Zoner Callisto 5 Free is based on the last commercial version of the program—Zoner Callisto 5. Thus it offers a full, mature range of functions, from transformations, alignment, and custom grids, to fully configurable pen and fill styles. Put it all together and you have software fit for preparing posters, websites, blueprints, price lists, and anything else where graphics are key.

The free version has all the functions of the commercial version, but for obvious reasons does not include the licensed fonts. Also, the free version does not include guaranteed technical support.

Zoner Photo Studio is comprehensive software for work with digital photographs. It accompanies users throughout the whole cycle of photo processing, including acquiring, editing, and touch ups, creating effects, organizing, archiving, publishing and sharing their work. Zoner Photo Studio was the first comprehensive digital photo processing software to include support for GPS and for creating 3D pictures.
