

Zoner Photo Studio FREE—Better Than Ever, Free Forever

San Francisco, California—January 17th, 2013—Today Zoner, Inc. announced the release of Zoner Photo Studio 15 FREE, the latest version of its popular free photo suite. The new Zoner Photo Studio FREE is based on the acclaimed Zoner Photo Studio 15 PRO and offers a complete solution for basic picture editing, organizing and sharing.

"We've developed the ideal software for those who want their photos to look great and want their photo collection safe, well-organized, and easy to share. And our fans can get a lot out of our software without even paying a cent, with Zoner Photo Studio FREE. There's no better freeware out there for the job," says Jaroslav Kucek, VP, Managing Director Zoner, Inc.

This photo suite offers photography lovers a way to get the whole job done in one place, from downloading to sorting, editing, and sharing their photos. With a variety of pro-class tools like batch edits and a panorama maker, it's a great way to make photos shine in just a few clicks. It's no surprise that this software has been recommended by the CNET editors and received acclaim from CHIP, Softonic, and many others.

The new features in the latest Zoner Photo Studio FREE are designed to make work with photos easier than ever. The new Import Module, for example, helps keep photos organized right from the moment they're downloaded off the camera. And when it's necessary to search for a photo after all, that's a matter of seconds thanks to the new Quick Search.

Editing is better than ever too, with easy new ways to fix photos or give them a fresh look: the new Quick Edits and Quick Filters. Quick Edits places the most common edits like exposure and white balance right at hand, while Quick Filters give easy access to cool looks like Polaroid and Lomo.

Instant sharing on Facebook, Flickr, Picasa, and Zonerama has been part of Zoner Photo Studio for years, but now photos stored on the Zonerama online gallery can be edited straight from the program.

The new version also includes a step-by-step First Launch guide to get beginners up to speed fast.
